DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller (US Patent Application 6,349,547) in view of "Official Notice". Miller discloses an apparatus for freezing a product and comprising the basic inventive step: a heat exchanger (12), an expander (16) for heat a quantity of water (see column 3), a pump (11), a first member movable fan blade (18) connected to a shaft and operate in response to refrigerant requirements, a braking friction surface suitable for absorbing energy (see column 4) and heat water. Examiner takes "Official Notice" since it is well known to use a vapor compression for cooling.

Allowable Subject Matter

Claims 12-21 are allowed over the prior art of record.

Claims 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

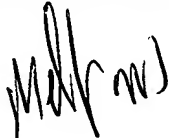

Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.
